

***Amendments to the Specification***

Please replace pages 1-10 of the specification with pages 1-12 of the enclosed substitute sheets. Applicant has also submitted herewith a strikethrough version of the specification indicating the amendments.

**Please amend the Abstract as follows:**

The invention relates to a bearing support with an instrumented movement (1), comprising a non-rotating bush-(2), a rotating bush-(3), roller elements-(4), arranged between the rotating (3)-and non-rotating (2)-bushes and an information recorder unit, with a sensor (7)-and a coder-(8), comprising a substrate (16)-made from an electrically non-conducting material and a thin layer (17)-of electrically-conducting material, supported by the substrate-(16). The substrate (16)-is fixed in rotation with the rotating bush-(3).
